Jarrold Jansson - Heavy Machine Operator | Civil & Mining Projects

HEADLINE

Heavy Machine Operator | Civil Construction & Mining | Excavators, Dozers & Haul Trucks | Strong Safety Record

ABOUT

With more than a decade of experience across major civil and mining projects throughout Australia, I've built my career on reliability, hard work, and a genuine commitment to doing the job right — every time.

I'm a hands-on Heavy Machine Operator who takes pride in turning up prepared, working safely, and delivering quality outcomes no matter the conditions. From large-scale production mining to complex civil works, I've worked across some of Australia's most demanding sites, operating a wide range of machinery including excavators, dozers, haul trucks, and GPS-guided plant.

What drives me is more than just production targets, it's knowing I've contributed to a safe, efficient site and supported the people on and off site. I take a strong safety-first approach, completing thorough pre-starts, identifying hazards early, and looking after equipment as if it were my own. I'm equally comfortable working independently or as part of a tight-knit crew and often step up to support team leadership when needed.

I'm known for my strong work ethic, practical mindset, and willingness to help wherever required — whether that's mentoring less experienced operators, assisting other trades, or jumping in on labouring tasks to keep a job moving.

I value teamwork, clear communication, and consistency, and I believe the best results come from crews that respect one another and take pride in their work.

If you're looking for a dependable operator who shows up, works safely, and takes real ownership of outcomes, I'd be happy to connect and have a conversation.

EXPERIENCE

Heavy Machine Operator

QH & M Birt Pty Ltd

2013 – Present

- Operating excavators, dozers, haul trucks, and water trucks across major civil and mining projects
- Production loading, cut and fill, trimming batters, and detailed excavations
