Janice Vignogna - Public Health & Clinical Nurse | Communicable Disease & Infection Control | Government Health Experience

HEADLINE

Public Health & Administration Professional | Data Entry | Compliance | Clinical & Government Experience

ABOUT

I'm a public health and clinical nurse with experience across frontline care, communicable disease management, and large-scale public health response. My work has always been grounded in a strong sense of responsibility — to patients, communities, and the systems that support safe, compliant care.

I've worked across community, acute, and public health settings, supporting case and contact management, outbreak response, infection prevention, and health education across diverse environments. I bring a calm, structured approach to my work, particularly in high-pressure situations where clear judgement, accurate documentation, and teamwork matter most.

Alongside my clinical background, I have developed strong administrative and data capability within regulated environments. I'm highly conscious of confidentiality, compliance, and audit requirements and take pride in maintaining accurate records that support both clinical outcomes and organisational accountability.

Colleagues describe me as reliable, and easy to work with — someone who communicates clearly, follows through, and contributes positively to team culture. I value collaboration, continuous learning, and workplaces that prioritise quality, safety, and integrity.

If you're looking for a clinical professional with strong public health insight, sound judgement, and a genuine commitment to doing the work well, I'd be happy to connect.

EXPERIENCE

Clinical Nurse – Public Health & Communicable Disease
Metro North Public Health Unit
September 2021 – Present

- Case and contact management for notifiable and communicable diseases in accordance with Queensland Health legislation and public health guidelines
- Conduct health assessments, risk stratification, follow-up, and escalation for cases and close contacts
- Provide outbreak management and infection prevention advice across aged care, disability services, education settings, and other community environments
- Liaise with clinicians, epidemiologists, environmental health officers, and external agencies to support coordinated public health responses
- Maintain accurate clinical documentation to support compliance, reporting, and audit requirements
- Contribute to service improvement initiatives, education activities, and stakeholder engagement

Clinical Nurse / Team Leader / Venue Health Manager
Hotel Quarantine Management Team
March 2021 – September 2021

- Provided clinical nursing care and health monitoring within hotel quarantine facilities during the COVID-19 response
- Supported day-to-day clinical operations, infection control compliance, and escalation pathways
- Led and supported multidisciplinary teams, including clinical and non-clinical staff
- Acted as a liaison between health services, emergency operations, police, and hotel providers
- Delivered education and guidance on infection prevention and control measures
- Participated in on-call rotations, responding to clinical and operational issues

Clinical Nurse – Community & Acute Care
Queensland Health & Affiliated Services
December 2019 – January 2021

- Delivered patient-centred nursing care across community, acute, and public health-aligned settings
- Conducted patient assessments, care planning, health education, and referrals
- Collaborated with multidisciplinary teams to ensure continuity of care
- Maintained clinical documentation in line with professional, ethical, and organisational standards
