RE: HEAVY MACHINE OPERATOR | PEAK DOWNS PROJECT

Dear Recruitment Team,

With more than a decade of experience across large-scale infrastructure and production mining projects, I bring a strong safety record, technical capability, and a reliable, hands-on approach to every site.

I have extensive experience operating a wide range of machinery, including excavators from 20T to 200T, D10–D11 dozers, haul trucks, andватер trucks, across projects such as Rio Tinto Hope Downs, Gemco South 32, and major highway upgrades. I am highly proficient in bulk earthworks, final trim, dewatering, and working around live services, with strong capability using GPS and laser-guided systems.

Safety and compliance are central to how I work. I consistently carry out thorough pre-starts, hazard identification, and equipment inspections, and I take pride in maintaining machinery in safe operational condition. I work well both independently and as part of a team and am comfortable stepping into leadership roles when required to support production targets and site outcomes.

I am a motivated and dependable operator who takes pride in delivering high-quality work on time and to specification. I would welcome the opportunity to contribute my skills and experience to your team and discuss how I can support your current and future projects.

Kind regards,

Jarrod Jannson
