

## EXAMPLE: LINKED IN PROFILE

**Angela Crowder - Senior Data Analyst | Compliance & Risk Analytics**

### HEADLINE

Senior Data Analyst | Compliance & Risk Analytics | Banking & Financial Services

### ABOUT

I'm a data and compliance professional who believes good analysis should do more than report numbers — it should create clarity, reduce risk, and support better decisions.

With over a decade of experience in banking and financial services, I've built a reputation for translating complex regulatory and operational data into insights that leaders can trust. I work best at the intersection of data, governance, and business — where attention to detail, critical thinking, and accountability really matter.

My approach is structured, considered, and outcomes-focused. I take pride in producing accurate, well-governed reporting, and in partnering with stakeholders to turn regulatory requirements into practical, measurable frameworks. I'm equally comfortable working deep in the data or stepping back to explain what it means and why it matters.

I value integrity, continuous improvement, and environments where quality and compliance are seen as enablers of long-term success rather than obstacles. I'm driven by work that strengthens systems, supports good decision-making, and delivers meaningful impact.

**If you're seeking a data professional who brings clarity, rigour, and a strong governance mindset, I'd be happy to connect and start a conversation.**
