To the Recruitment Team
Metro North Health
Chermisde, Brisbane

RE POSITION: CLINICAL NURSE / PUBLIC HEALTH ROLE REF: CN46759

Dear Recruitment Team,

With a background spanning frontline nursing, public health response, and regulated health environments, I bring a strong commitment to patient safety, compliance, and quality outcomes.

Throughout my career, I have worked across community, acute, and public health settings, including communicable disease management and outbreak response. I have extensive experience conducting health assessments, managing complex cases, and providing infection prevention and control guidance across diverse environments such as aged care, disability services, and education settings.

I am known for my calm clinical judgement and reliability in fast-paced, high-pressure environments. I work confidently within established frameworks and legislation, maintain accurate clinical documentation, and collaborate closely with multidisciplinary teams to ensure timely, coordinated responses that support both individual and community outcomes.

In addition to my clinical background, I bring strong administrative and data capability developed in regulated environments where accuracy, confidentiality, and audit readiness are essential. This combination allows me to contribute effectively to both clinical delivery and the systems that support safe, compliant care.

I am motivated by roles where professionalism, accountability, and service to the community are valued, and I would welcome the opportunity to contribute my skills and experience to your organisation.

Kind regards,

Janice Vignogna
